

Compatible dimmers

Lirio cannot control full compatibility with all available dimmers. Before installation, please check below list of compatible dimmers.

Below is a list of Philips tested wall dimmers which are compatible with Lirio by Philips LED luminaires.

Supplier	Supplier Reference	Supplier	Supplier Reference
Berker	286710	N&L	28985
Busch Jaeger	6513U-102	Niko	310-02800
Drespa	433HAB	Opus	852.395
Everflourish	EFE700DC	Peha	433HAB
GIRA	30700	Schneider electric	ATD315
GIRA	universal dimmer	Schneider electric	LTD450 RC/RL
Hager	Kallysto (WH 20 30 08 00 A)	Siemens	5TC8 284
Hager	Kallysto (WH 20 30 08 00 C)	Varilight	IDQI401MS
KOPP	8078	Wuyun	W13-C162
Legrand 67084	Celiane	Migros	6120.106
Legrand 78401	Mosaic	Migros	6120.109
Lutron	RNSU-452	Feller	3306.24.s.fmi.61
Merten	5771	Feller	40300.rc.fmi.61

These dimmers are tested in a laboratory environment and in various scenarios to ensure a wide array of possible home experiences. However, if in doubt, please consult a lighting professional to ensure all safety requirements and standards are met for your personal situation.

Following external factors can influence the dimming behaviour:

Other loads than the Lirio by Philips luminaire in the same electrical circuit

Total wattage load too high in relation to allowed dimmer load

Max. 8 drivers (10 or 30W) on 1 dimmer

Please check the user manual of the dimmer

(e.g. adjustment need for the screw or the dimmer might not be set in the right position, etc)

Some other articles are equipped with integrated dimmers

(indicated on commercial packaging, user manual and website).
